

Flap Disc

One Versatile Solution for Multiple Tasks

When it comes to completing the task of cutting, polishing or the simple work of grinding down a piece of steel, a good solid SK Abrasives Flap Disc is exactly what you need. The overlapping design of the Flap Disc allows fresh grains to be exposed when the outer layer is worn down to ensure consistent and longer lasting performance life compared to most standard flat abrasive discs.

SK Abrasives Flap Discs are made of of Zircon (Zir) and Aluminium Oxide (A/O) abrasive flaps that are bonded to a tough fibre reinforced backing plate.

Recommended Usage & Application

Generally indicated for cutting, grinding and polishing, SK Abrasives Flap Discs can easily be mounted onto any right angled grinding machine. Other recommended applications include use as a rust remover or as an alternative to standard sanding discs.

Point of Interest

Zircon grains used for the finishing and polishing of hard metal surfaces such as stainless steel, whereas Aluminium Oxide grains are indicated for use on softer surfaces such as aluminium and zinc die-cast.

Aluminium Oxide Flap Disc

Stock Code	Description	Grade
SKAOFD-10016	SK Abrasives Aluminium Oxide Flap Disc 100mm X 16mm	P040A/O – P320A/O
SKAOFD-12522	SK Abrasives Aluminium Oxide Flap Disc 125mm X 22mm	P040A/O – P320A/O
SKAOFD-18022	SK Abrasives Aluminium Oxide Flap Disc 180mm X 22mm	P040A/O – P320A/O

Zirconia Flap Disc

Stock Code	Description	Grade
SKAFD-10016	SK Abrasives Zirconium Oxide Flap Disc 100mm X 16mm	P040ZIR – P320ZIR
SKAFD-12522	SK Abrasives Zirconium Oxide Flap Disc 125mm X 22mm	P040ZIR – P320ZIR
SKAFD-18022	SK Abrasives Zirconium Oxide Flap Disc 180mm X 22mm	P040ZIR – P320ZIR

Small Backing Flap Disc

Stock Code	Description	Grade
SKSBFD-10016	SK Abrasives Small Backing Flap Disc 100mm X 16mm	P040A/O – P120A/O
